

Matias Nicolas Speroni Fabio

Junior Platform / DevOps Engineer

CI/CD · Docker · Linux · Cloud fundamentals
Barcelona, Spain · +34 689 51 82 35 · mnicolas03sp@gmail.com
linkedin.com/in/matias-speroni · github.com/EISenpaiSAMA · matias-nicolas-speroni.vercel.app

PROFESSIONAL SUMMARY

Software developer moving into Platform / DevOps engineering. Hands-on experience building CI/CD pipelines with GitHub Actions, publishing Docker images and deploying them to a self-hosted Coolify hub secured with Pomerium Zero Trust, with isolated development and production environments per application. Production experience since 11/2024 (.NET/C#, PostgreSQL, Python automation); promoted from intern to developer in under six months. Also build AI agents and agentic workflows, and use AI coding agents in daily development. Looking to keep growing in infrastructure as code, Kubernetes and cloud.

TECHNICAL SKILLS

CI/CD & Automation: GitHub Actions (Intermediate) · Git (Intermediate) · Python scripting (Intermediate) · Bash (Basic)
Containers & Orchestration: Docker (Intermediate) · Kubernetes (Basic)
Operating Systems: Linux (Intermediate) · Windows (Advanced)
Cloud & IaC: AWS (Basic) · Terraform (Basic)
Platform: Coolify self-hosted PaaS · Vercel · Dev/prod environment isolation
Security: Pomerium Zero Trust · Row Level Security (PostgreSQL/Supabase) · JWT & role-based authentication · Secrets & environment variables (Basic) · SSH, HTTPS/TLS (Basic) · Least-privilege access (Basic)
Databases: PostgreSQL (Intermediate) · SQL Server · MySQL · Supabase · Firebase
Development: Python · C# / .NET · TypeScript · SQL · FastAPI · Next.js / React · REST APIs · Prisma · EF Core
AI & Agents: AI coding agents · Agentic workflows (LLM tool/function calling) · n8n automation · Ollama · Structured-output LLM calls
Data: ETL · KPI / data modeling · SQL

PROFESSIONAL EXPERIENCE

- Software Developer — Imagine Group, Barcelona, Spain** 05/2026 – Present
- Built CI/CD pipelines with GitHub Actions that build and publish Docker images, deployed automatically to a self-hosted Coolify hub.
 - Maintained isolated development and production environments per app, each with its own PostgreSQL database, on the centralized hub secured with Pomerium Zero Trust access control.
 - dm-tools:** built the data integrations for a suite of ~20 AI marketing tools, unifying 6 data sources (Meta, TikTok and Google Ads, GA4, Shopify, Merchant Center) into automated performance and product-intelligence reports (ETL, KPI modeling, SQL on PostgreSQL/Supabase).
 - Imagine OS:** multi-org PSA platform on Supabase (PostgreSQL + RLS) with margin and utilization analytics per client, project and person; built an agentic AI assistant that executes actions inside the platform through tool/function calling.
 - AdSpark:** AI creative-ideation app with brand analysis from URL and full ES/EN/CA internationalization (Next.js 16, React 19, Supabase, OpenAI).
- Backend Developer — Novicell ES, Barcelona, Spain** 05/2025 – 03/2026
- Built C# and .NET integrations on Sitecore across 3+ simultaneous client projects, delivering consistently across sprints with no production incidents.
 - Worked in sprint-based delivery: planning, reviews and coordination with project managers; contributed to Next.js frontends when needed.
 - Promoted from intern to developer in under 6 months, the only one on the team that year.
- Backend Intern — Novicell ES, Barcelona, Spain** 11/2024 – 05/2025
- Developed and maintained dynamic websites in .NET and Sitecore on real production codebases from day one; learned C# and Sitecore entirely on the job.

SELECTED PROJECTS

Spotify Top Tracks Pipeline — Automated ETL that extracts top tracks from the Spotify API, cleans them with Pandas, loads SQLite and renders a Plotly chart. Scheduled weekly with GitHub Actions, which commits the refreshed data and chart back to the repository with no manual steps. *Python, Pandas, SQLite, GitHub Actions.*

Mira.IA (in development) — Multi-tenant SaaS for AI search visibility analytics (GEO/AEO): runs monitored prompts across ChatGPT, Claude, Perplexity and Gemini and extracts brand mentions, position and sentiment with structured-output LLM calls. JWT auth, server-side plan limits, daily scheduled runs and per-run cost tracking. *Next.js 16, PostgreSQL (Supabase), Prisma.*

Sala de Reservas — Room booking platform with role-based authentication, admin panel and email notifications (Resend API). *.NET, EF Core, Tailwind CSS.*

Study Bot — AI academic assistant with mock-exam generation from personal notes and Google Calendar integration. *React, FastAPI, Ollama, SQL Server.*

EDUCATION

Degree in Applied Data Science — UOC (Universitat Oberta de Catalunya)	Expected 09/2026
CFGS in DAM (Multiplatform App Development) — Prat Educació, Barcelona	09/2023 – 05/2025
Electronic Technician — Instituto Leonardo Murialdo, Buenos Aires	03/2019 – 12/2022

CERTIFICATIONS

IBM: Python for Data Science, AI & Development (03/2026) · Introduction to Data Engineering (03/2026)
UTN.BA: Python 3, Beginner Level (2023) · Fundamentals of Programming (2022)

LANGUAGES

Spanish — Native / Bilingual · English — B2
